

Homework 7: Getting draft of paper ready

Due Date: 11/13/2024

Research Paper Homework Instructions: Please finish writing the final draft of your research paper linked [here](#)

Finish describe the following methods:

- [Linear regression](#)
- [Logistic regression](#)
- [Sentiment analysis](#)

Add the limitation section of your paper based on the following guidelines:

- **Acknowledge Constraints Honestly**
 - Identify aspects that limited your study, such as sample size, methodology, data availability, or time constraints. This builds transparency and credibility
- **Explain the Impact on Findings**
 - Describe how each limitation may have influenced the results or interpretations. Make it clear whether the limitations introduce bias, restrict generalizability, or affect accuracy.
- **Provide Suggestions for Future Research**
 - Frame limitations as opportunities for further investigation by suggesting how future research can address them or explore related questions.

Conclusion

- **Summarize Key Findings:**
 - Recap the most important results or insights. Avoid going into too much detail or repeating the analysis.
- **Discuss Implications:**
 - Explain the broader significance of your findings. How do they contribute to existing knowledge or influence the field?
- **Acknowledge Limitations:**
 - Briefly address any limitations in your study, such as sample size or methodology constraints.
- **Suggest Future Research:**
 - Point out potential areas for further investigation. This shows the paper's relevance and encourages ongoing inquiry.
- **End with a Closing Thought:**
 - Conclude with a thought-provoking statement, prediction, or call to action related to the study's impact.

Introduction

- **Hook the Reader:**
 - Start with an attention-grabbing statement, question, statistic, or anecdote relevant to your topic.
- **Contextualize the Topic:**
 - Provide background information to help the reader understand the research's relevance. Define key terms or concepts if needed.
- **State the Research Problem:**
 - Clearly articulate the problem or question your paper addresses. This helps set up the purpose of the study.
- **Highlight the Research Gap:**
 - Briefly mention gaps in current knowledge or issues with past research, making a case for why your study is needed.
- **State Objectives & Hypothesis:**
 - Outline your study's objectives and, if applicable, present your hypothesis.
- **Conclude with a Roadmap:**
 - Summarize the paper's structure, so readers know what to expect in each section.
